SUMMARY

Genda is an open-minded web developer who's ready for new challenges.
He has spent most of his career in web development—starting with PHP and Javascript, later working with Golang and Solidity, and now he's mastering the front-end field.
He loves working with great people, inspiring others, and being inspired.

EXPERIENCE

Full Stack Developer — 2020 - PRESENT
Via Freelancer
- Created and improved back-end and front-end solutions on complex projects.
- Developed a knowledge system based on Confluence, using custom themes and plugins.
- Worked several blockchain jobs for mining, staking, marketplace
- Built a complex UI and also GWTP.

Frontend Developer — 08/2020 - 12/2021
TEAM International Services
- Created a photo and video contest web app for a US startup, users could upload photos and videos and could participate in contests where the best upload would get prizes. The app was made with scalability in mind.
- Contributed as part of the team that developed a new webshop app for a large retailer in Croatia.
- Made a tablet app with a custom CMS back end for the Croatian branch of Allianz, the insurance company. We migrated all the insurance sales documents to a digitalized format that they could keep up-to-date via the CMS.

Frontend Developer — 01/2018 - 02/2020
PHT JAPAN LLC.
- Developed a modern application for controlling devices in homes.
- Designed the application architecture on TypeScript, React, and Redux.
- Integrated a real-time WebSocket to see all changes intermediately.
- Designed a REST API with a subteam of back-end developers.
- Implemented pixel-perfect design using vertical alignments.
- Created 27 web portals for the Football Federation in Australia, based on a custom dynamic template system.
- Created a number of responsive web apps and pages.

Web Developer — 07/2015 - 11/2017
Nakai Enterprises LtdNexity
- Developed an application from the ground up; also configured the project structure and application skeleton.
- Reworked completely a magazine site using the framework Laravel.
- Integrated Google Maps for displaying event locations.
- Developed an application from the ground up; also configured the project structure and application skeleton.
- Delivered application screens: the login, reset password flow, and administration pages.
